Source: MTD Marketing of Wisconsin, Inc.

Year-to-date housing starts, compared over time, can provide valuable trend information. The chart above reflects starts in 13 municipalities\* in the Fox Cities area of Wisconsin.

It is unlikely that the number of starts per year will return to 2004 and earlier highs any time soon, but a decrease in the rate of decline of the starts signifies an appropriate and important mix of housing supply and demand in the Fox Cities.
